

MOBILE HAND WASH STATION

CALL US:

08 9258 3033

Ideal for fuel stations, shopping centres, supermarkets, warehouses and essential retail outlets

Simcraft Products has developed a Mobile Hand wash station for the fight against the COVID-19 virus. Featuring a soap dispenser, hand towel dispenser and timed push button tap that automatically shuts off to prevent contact with any surfaces after hands have been washed. This unit can be easily transported and installed in any location with a nearby external tap and sewer or storm drain (biodegradable soap only). Each unit comes with 2L of biodegradable liquid soap and 240 metres of hand towels ensuring the station can be used immediately after installation. Adjustable feet with fixing holes enable the station to be installed and secured to most ground types including uneven or sloped surfaces.

Design Features:

- Grade 304 stainless steel for durability and vandal resistance
- Soap dispenser and towel holder mounted on rear splashback*
- Push button timeflow tap that automatically shuts off to prevent contact with any surface after hands have been washed
- Smooth surfaces make for easy cleaning to maintain hygiene
- Stainless steel frame for rigidity
- Height adjustable feet for easy leveling of station

* style may vary according to availability
